GRAVITY

Spring Schedule 2019

Test of FAITH

There is a popular myth at large in both society and the church: that science and Christianity have been engaged in a long battle over the centuries. But are science and Christian faith **really** in conflict?

Does the big bang disprove God? What about evolution? Where is the science in the Bible?

For the next few weeks we will be looking into these questions through the Test of Faith course by the Faraday Institute.

Resident DJ

Fancy yourself as a bit of a music aficionado or budding disc jockey? Let us hear your tracks at Gravity! Send a list of your favourite songs to the email address on the back page and you could be our resident DJ for the evening. It's either that or you get to hear Andrew's choice in music every week and, let's face it, anything is better than that...

Date	Event
